Github: <https://github.com/ShubhamKumar284>

Email: shubhamkumar240804@gmail.com

Mobile: +91-7903443693

SKILLS

Languages:	C++, Python, C, Java
Frameworks:	Pandas, Numpy, Matplotlib, Seaborn, Scikit-learn
Tools / Platforms:	MySQL, Power BI, Excel, Google Colab, Git, GitHub, VS Code
Data Science:	EDA, Data Preprocessing, Feature Engineering, Visualization, Statistics
ML Algorithms:	Linear Regression, Naive Bayes, SVM, K-Means, Logistic Regression
Big Data:	Hadoop, Spark, HDFS, MapReduce, Hive, HBase, Cassandra
Core CS:	Operating System (OS), Computer Networking, Database (DBMS)
Soft Skills:	Problem Solving, Critical Thinking, Coordination, Teamwork, Adaptability

PROJECTS

Sector-wise Revenue & Expenditure Analysis | Github

Oct' 25 - Dec' 25

- Applied **Machine learning Algorithms** to analyze and predict state-wise revenue and expenditure patterns using historical budget data.
- Performed data preprocessing, feature scaling, and model evaluation using Python (Pandas, NumPy, Scikit-learn) with metrics like **R², MAE, RMSE, Precision, Recall, and F1-score**.
- Generated clear, data-driven insights through visual analytics, identifying spending behavior patterns and state groupings, improving fiscal analysis efficiency by 30%.
- Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, ML Algorithms

BMW Sales Performance & Growth Analysis Dashboard | Github | Live

Oct' 25 - Dec' 25

- Built an interactive **Power BI** dashboard to visualize BMW sales performance across regions, years, models, fuel types, and colors using real-world automotive data.
- Executed data preprocessing and transformation using **Power Query Editor**, including cleaning, normalization, and creation of calculated columns and DAX measures for trend analysis.
- Identified top-performing regions and models, fuel-adoption shifts, and customer preferences, improving sales planning accuracy by ~30% and decision efficiency by 25%.
- Tech Stack:** Power BI, DAX, Power Query, Data Modeling, Interactive Dashboard Design

Shipment Track – Shipment Movement Tracker (mini project) | Github

Jun' 25 - Jul' 25

- Designed and improved a graph-based system to track and analyze shipment movements between multiple locations, supporting shortest-path routing, cycle detection, and shipment flow analysis.
- Implemented using **C++, STL (unordered_map, list, queue, stack, unordered_set)**, and graph traversal algorithms (**BFS, DFS**) for efficient shipment route processing.
- Developed a robust shipment tracking system with improved route visualization and loop detection, boosting analysis efficiency by 35% and enabling future real-time tracking upgrades.
- Tech Stack:** C++, STL, Graph Structures, BFS/DFS, Cycle Detection, Shortest Path Algorithms

CERTIFICATES

Cloud Computing NPTEL Certificate	May' 26
GFG 160 days DSA challenge GFG Certificate	Apr' 26
GEN AI NASSCOM Skill Development Program – SFJ Certificate	Feb' 26
Adobe India Hackathon Unstop Certificate	Aug' 25
CodeSmart: Foundation and Data Structure in C, C++ and Java LPU Certificate	Jul' 25
Unrevealing Basic Python towards ML/AI CSE Pathshala Certificate	Mar' 24

ACHIEVEMENTS

- [Achieved Contest Rating 1531](#)
800+ problems solved, 6 badges earned, 200+ day streak in LeetCode.
- [Attained a prominent ranking under 250 at university level](#)
Solved 400+ programming problems, demonstrating algorithmic proficiency in GFG.

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.01**

Phagwara, Punjab

Aug' 23 - Present

Eklavya Educational Complex

Intermediate; **Percentage: 84.2%**

Patna, Bihar

Apr' 21 - Mar' 22

Sri Sathya Sai Vidyapeeth

Matriculation; **Percentage: 92%**

Kozhikode, Kerala

Jun' 19 - Mar' 20
